

# BETTER 175

## Productivity-First Tractor

The Better 175 is a productivity-first tractor built on Italian-engineered architecture designed to increase output per operator, minimize fleet size, and scale operations without adding labour.

Full Bidirectional Design

Reversible Operator Station

Four Wheel Steering

Rugged Terrain Control

Powerful Eco-friendly Engine

## Productivity-First Tractor

The Better 175 is a Italian-engineered productivity first tractor designed for demanding operations where efficiency, visibility, and machine capability directly impact output.

The Better 175 was engineered differently.

## True Bidirectional Design with Reversible Operator Station

At the center of its architecture is a bidirectional platform with a reversible operator station. Attachments can be mounted at either end of the tractor, and the operator station rotates 180 degrees so the operator can face the working implement directly. This improves visibility, control, precision, and output while reducing fatigue and accidents during long working shifts.

Crab

## Powerful Eco-Friendly Engine

A 170 HP 4.5-litre FPT / Iveco Tier 5 eco-friendly diesel engine delivering 155 HP to the PTO provides the power and performance required to operate demanding commercial attachments while maintaining efficient fuel consumption.

## 4 Wheel Steering and Rear Axle Swivel

Independent four-wheel steering combined with a low profile design and rear axle swivel allow the machine to maneuver safely and efficiently in confined environments, across rugged terrain, and along slopes or embankments where conventional tractors fail. Nitrogen accumulators actively adjust hydraulic pressure to balance heavy loads, dampen shocks and vibrations making operation more comfortable.

**155 HP to PTO**

## Hydrostatic Transmission and Controls

A hydrostatic transmission paired with dual hydraulic pumps, multi-function joystick, and integrated foot pedal allows operators to transition quickly and smoothly from heavy-duty, repetitive and precision work to a top travel speed of 40+ km/h.

## Quick Connect 3 Point Hitch

Quick-connect lower links, a hydraulic top link, and ground-level hydraulic controls allow a single operator to quickly change 3 Point Hitch (3-PTH) attachments as operational needs change.

## Higher Plus Loader

The Higher Plus Loader is specially designed for the Better 175. It is fitted with a quick-coupling system for easily attachment. This loader stands out for its second arm, which can reach a height of 4.4 metres. The Higher Plus has a load capacity of 1000 kg and is fully controlled from inside the cab, as the controls are integrated into the joystick and display.

## Specifications

Weight : 4,500 kg  
 Engine: 4.5 Litre FPT N 45 Stage 5  
 Power: 125 kW / 170 HP at 2200 RPM  
 Max Engine RPM: 2375 RPM  
 Max Torque: 710 Nm at 1500 RPM  
 PTO: 155 HP 540 or 1000 RPM C or CC  
 Transmission: Hydrostatic  
 Gearbox: Mechanical 2-Speed  
 Hydraulic System: 155 L/Min  
 Cab End 3 PTH: 4,500 kg Category 2  
 Engine End 3 PTH: 3,000 kg Category 2

## Custom Colours

The Better 175 is available in many colours, including metallics to suit your brand.

## Custom Tires

Multiple tire sizes and tread patterns are available to ensure the Better 175 excels under extreme weather or rugged terrain.
